

YMCA TRINITY GROUP

YMCA

**YMCA Trinity Group
Gender Pay Report:
Snapshot date 5th April 2020**

YMCA Trinity Group's mission is 'Inspiring communities, transforming young lives'.

We serve communities across Suffolk, Cambridge and Peterborough. This is our first gender pay report.

The mean hourly rate for men and women

Men employed by YMCA Trinity Group earn 8.4% more than women.

The 'mean' is a method for calculating an average. We calculate the mean by adding together all of the hourly rates together for men, then dividing by the total number of men employed, then repeat for women.

Men employed by YMCA Trinity Group earn 7.5% more than women.

‘Median’ is another method for calculating an average. If all the women and all the men employed by YMCA Trinity Group stood in two separate lines, in order of pay, the median would be the difference in pay from the middle man in the line compared to the middle woman.

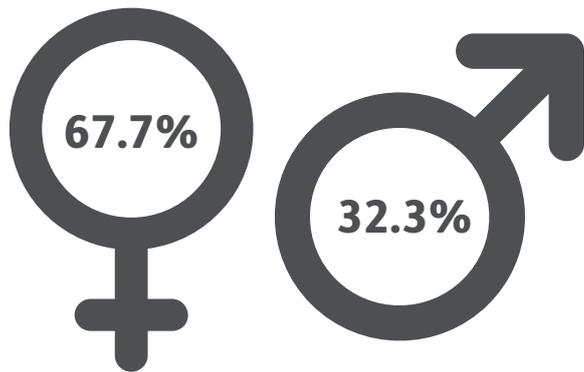

We do not operate a bonus system and therefore have no figures for this area.

YMCA Trinity Group are committed to equality and inclusion throughout our work and projects. We use a job evaluation tool to ensure staff are paid equitably across the organisation. Even though we have used our job evaluation tool to ensure equal pay, we can still have a gender pay gap, this is due to the different roles in the organisation that men and women work in.

In order to meet the needs of our community we have a range of project areas; Supported Accommodation, Health and Wellbeing, Youth Work, Childcare and Training and Development. To meet the needs of these programmes, we offer a range of employment contracts.

These charts show our charity divided into 4 equal groups (quartiles). We employ more female staff than male in every quartile of our organisation.

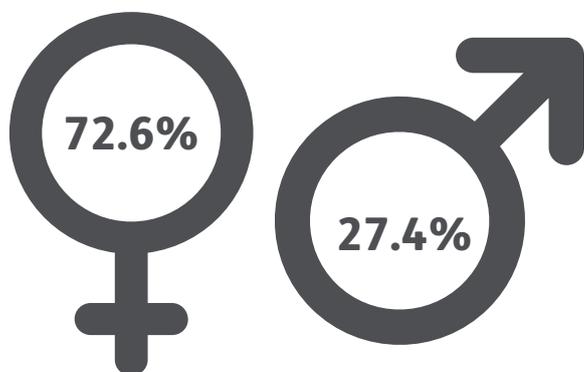

Upper Quartile

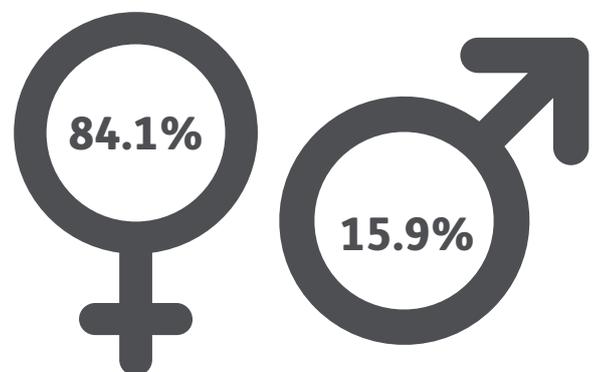

Upper Middle Quartile

Lower Middle Quartile

Lower Quartile

We have 6 childcare settings in our charity. Childcare is predominantly staffed by female workers. The childcare team can work full or part time in either Term Time or 'all year round' contracts. These contract types and the high female workforce influence our pay gap. Our childcare team range from Apprentices to staff qualified to degree level, this female workforce is reflected in all quartiles of our organisation.

We have robust and transparent safer recruitment process, including when recruiting for promotion opportunities. We continue to review our working practices to ensure we offer an environment where staff have a positive balance between work and home and are able to reach their potential.
